Memphis, Tennessee 38112

**RE: Lead in Drinking Water Sampling  
Ford Road Elementary School  
3336 Ford Rd  
Memphis, Tennessee  
Tioga Project No.: 24816.00**

Dear Mr. Krone,

At the request of Shelby County Schools (the Client), Tioga Environmental Consultants (Tioga) performed sampling of drinking water sources at the above referenced school for laboratory analysis of total lead concentrations. At the request of the Client, sampling was conducted on potable water sources in the kitchen and water fountains throughout the first floor of the school. Sampling was conducted early in the morning, before any potable water sources had been used for the day and prior to the arrival of any students or faculty.

On August 31, 2017, Tioga representative Felipe Vazquez arrived onsite and was escorted through the building by Shelby County Schools risk management personnel. First-draw potable water samples were collected in accordance with the Environmental Protection Agency (EPA) regulations codified in 40 CFR 141.86, and were documented and transferred under chain-of-custody protocol to Waypoint Analytical Laboratories in Memphis, Tennessee for analysis of total lead content.

**Results Based on Laboratory Analysis:**

Table 1 on the following page summarizes the sampling locations, laboratory analytical results, and EPA action level for lead in drinking water. Sample results with a "<" symbol did not contain lead content above the laboratory detection limit.

**Down-to-earth partners. Sky's-the-limit solutions.**

**Table 1**  
**Summary of Analytical Results**  
**Ford Road Elementary School**  
**August 31, 2017**

Sample ID	Sample Location	Total Lead (µg/L)	EPA Action Level (µg/L)
26-1	Kitchen sink	4.11	15
26-2	Water Fountain in Cafeteria Left	<0.513	
26-3	Water Fountain Cafeteria Right	1.11	
26-4	Water Fountain across from Room 18 Left	<0.513	
26-5	Water Fountain across from Room 18 Right	<0.513	
26-6	Water Fountain next to Room 23 Right	3.56	
26-7	Water Fountain next to Girls Restroom near Room 23 Right	2.08	

(µg/L) = Micrograms of lead per liter of water (parts per billion)

A review of the laboratory analytical results of the water samples collected revealed that no water samples collected during this sampling event exhibited total lead levels above the EPA action level for drinking water.

**Recommendations:**

Based upon the laboratory analytical results of the seven potable water samples collected from Ford Road Elementary School, Tioga has found no evidence of elevated lead concentrations above the EPA action level for drinking water, and therefore makes no recommendation for further testing at this site.

**Limitations**

Potable water sources with elevated lead levels may potentially be present in areas of the property that are not addressed with this report. This investigation only included the potable water sources specifically addressed.

We appreciate the opportunity to provide you with this service. Should you have any questions regarding this report, please contact me at (901) 791-2432.

Sincerely,  
TIOGA ENVIRONMENTAL CONSULTANTS, INC.

Eric Davis, CIE  
Environmental Scientist

**Enclosure: (1) Laboratory Analytical Report**

Ref: Analytical Testing  
 Lab Report Number: 17-243-0277  
 Client Project Description: Site 26  
 Project # 24816.00

Dear Mr. Luke Hall:  
 Waypoint Analytical, Inc. received sample(s) on 8/31/2017 for the analyses presented in the following report.

The above referenced project has been analyzed per your instructions. The analyses were performed in accordance with the applicable analytical method.

The analytical data has been validated using standard quality control measures performed as required by the analytical method. Quality Assurance, method validations, instrumentation maintenance and calibration for all parameters (NELAP and non-NELAP) were performed in accordance with guidelines established by the USEPA (including 40 CFR 136 Method Update Rule May 2012) and NELAC unless otherwise indicated. Any parameter for which the laboratory is not officially NELAP accredited is indicated by a '~' symbol. These are not included in the scope because NELAP accreditation is either not available or has not been applied for. Additional certifications may be held/are available for parameters, where NELAP accreditation is not required or applicable. A full list of certifications is available upon request.

Certain parameters (chlorine, pH, dissolved oxygen, sulfite...) are required to be analyzed within 15 minutes of sampling. Usually, but not always, any field parameter analyzed at the laboratory is outside of this holding time. Refer to sample analysis time for confirmation of holding time compliance.

The results are shown on the attached Report of Analysis(s). Results for solid matrices are reported on an as-received basis unless otherwise indicated. This report shall not be reproduced except in full and relates only to the samples included in this report.

Please do not hesitate to contact me or client services if you have any questions or need additional information.

Sincerely,

Randy Thomas  
 Project Manager

*Laboratory's liability in any claim relating to analyses performed shall be limited to, at laboratory's option, repeating the analysis in question at laboratory's expense, or the refund of the charges paid for performance of said analysis.*
